## Welcome to...

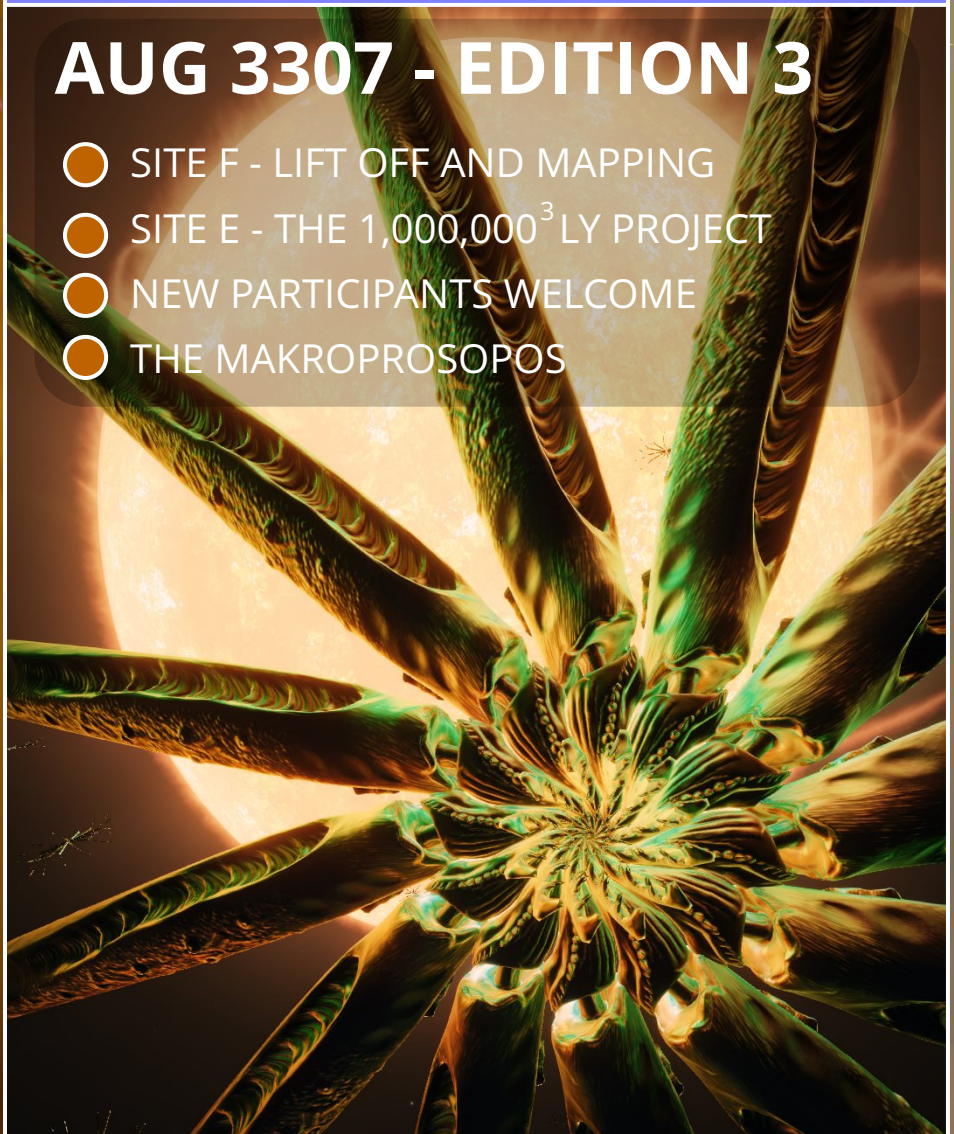

The Seekers Rest. An E-magazine & website for the Banana Nebula Expedition player group & our own Nebula Discoveries LLC (NBLC) Faction & squadron.

Here you can find a NEWS ARCHIVE of our exploits, from birth to present day. A MISSIONS section, which describes our ongoing activities in the area of exploration. A NBLC FACTION section which attempts to explain who, what and why we love to snuggle. There is also an E-MAG ARCHIVE and a new CMDR ALBUMS section.

Feedback welcome via Discord DM to ADM Infwhale.

## AN ARCHIVE...

Of the Banana Nebula Expedition, with the latest news first.

The news archive goes back to FEB 3306 and contains information about events that have unfolded over time, covering discoveries and all of the undertakings that have gone on since.

NOTE! Buttons like those opposite provide links to data, forms, discord, reddit posts and CMDR videos.

### AUG 3307

**Another busy month at the BNE:** Site F mapping started so the new Site F area has been added to the website missions page. 2 FC's are now on site and The Makropoulos (Admiral THEpREDEITOR) has been commissioned to assist, departing on the 20th. Data is now being gathered placing Gyre Trees and Pods on the menu.

While the site has been divided into 3 areas (A, B and C) the density of stars is a little varied. New mapping methods are under development to aid those that might choose to help with mapping. It's nice to see something other than molluscs.

Summer Holidays have left us with a skeleton crew, but ADM Infwhale, self isolating, has filled the time with the 1,000,000 cubic light year mapping project at the centre of Site E. Now completed the area held 3645 star systems. Over 1000 NSP systems have now been identified. Full data can be found in the missions area. This focussed method is also now being applied at another spot in Site E and Site F.

On a final note, please welcome 2 new BNE Participants: CMDR Lorian, An excellent char from the fantastic 90's sci-fi Babylon 5. CMDR Will Magpie - A new (2021) Elite Dangerous exploration fan. 67-3)

### JULY 3307

The BNE marked its 1st anniversary on July 11th 2021. It has been an exhilarating year to say the least. The ups and downs of life have had an effect on all of us, but our love of the game and community have kept us going thus far.

The Fleet Command wish to thank you all, past and present for your hard work and dedication to the cause.

In honour of this occasion, several projects have been completed:

1) - A new FC has been commissioned by ADM W4RZ0N3 (aka BatLeZone) to represent the BNE in our home system. Say hello to...

**SDFC BANANAGEDDON - See her arrival -**

2) - A new edition of the BNE e-Magazine was made available. See the e-magazine archive. But why download a pdf when you can now -

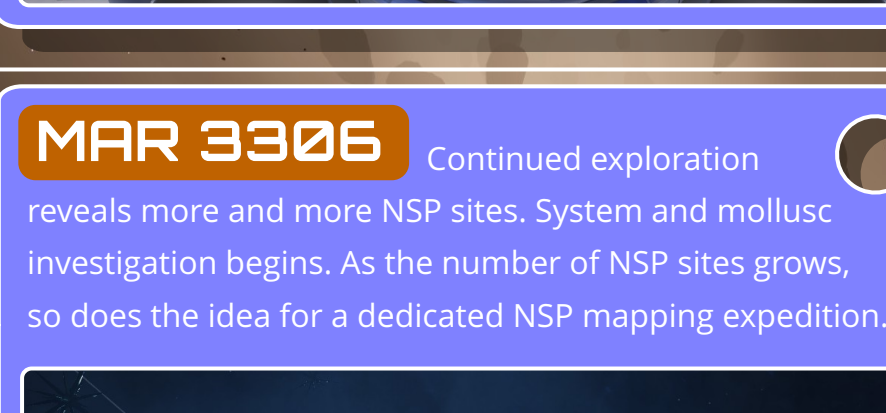

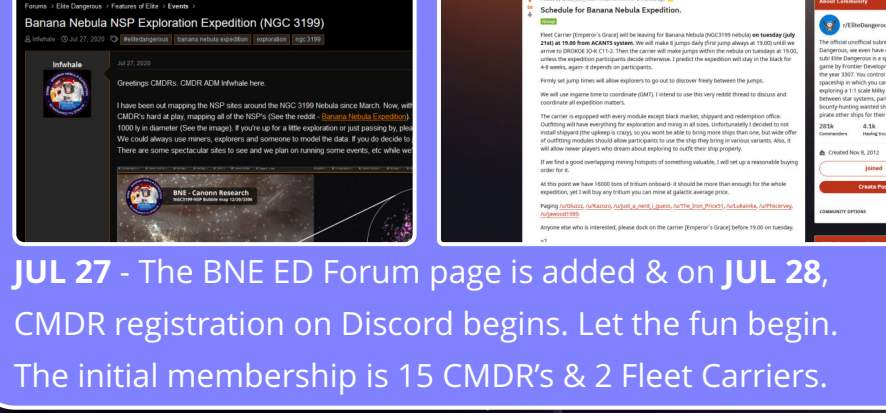

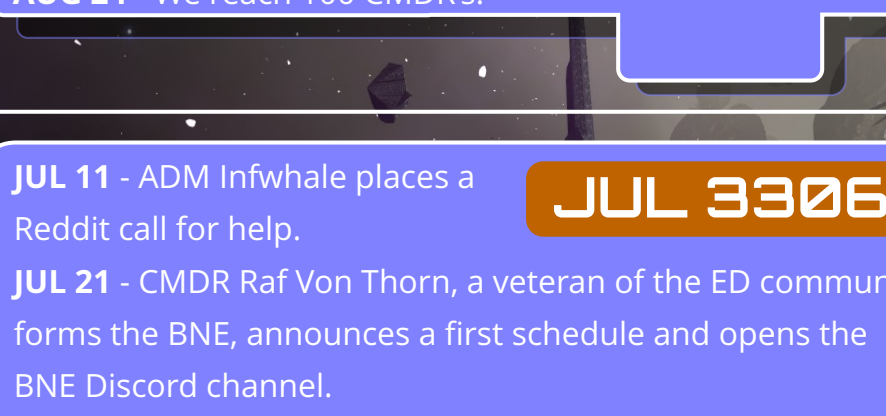

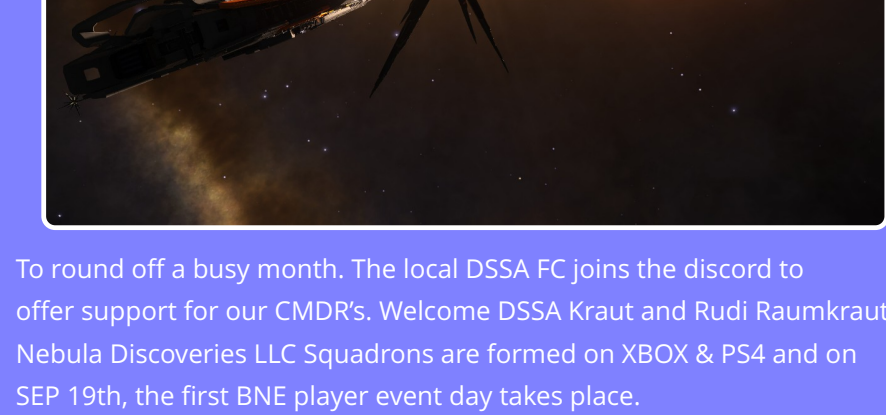

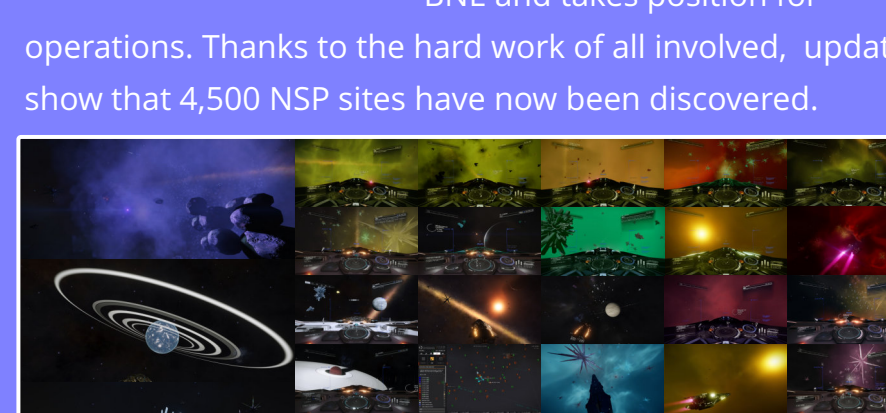

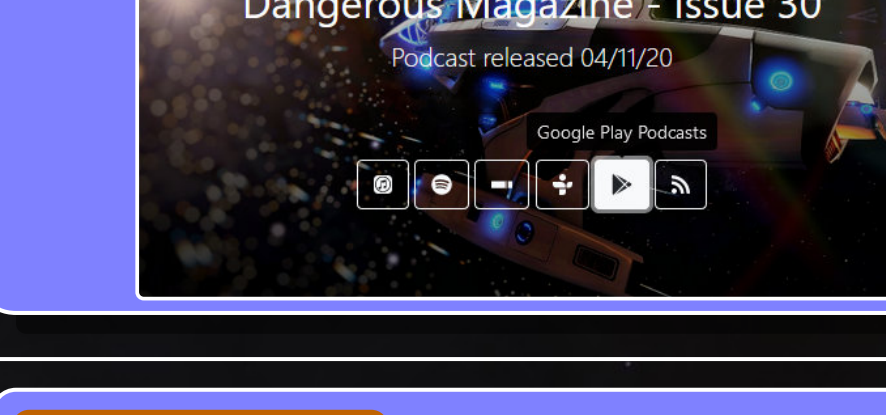

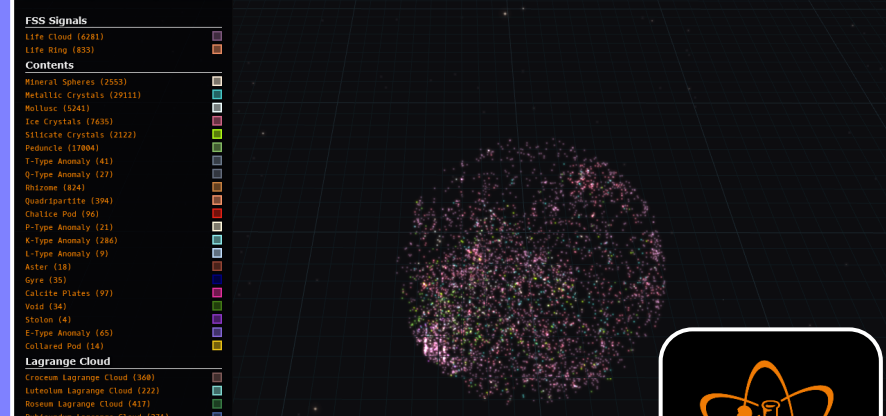

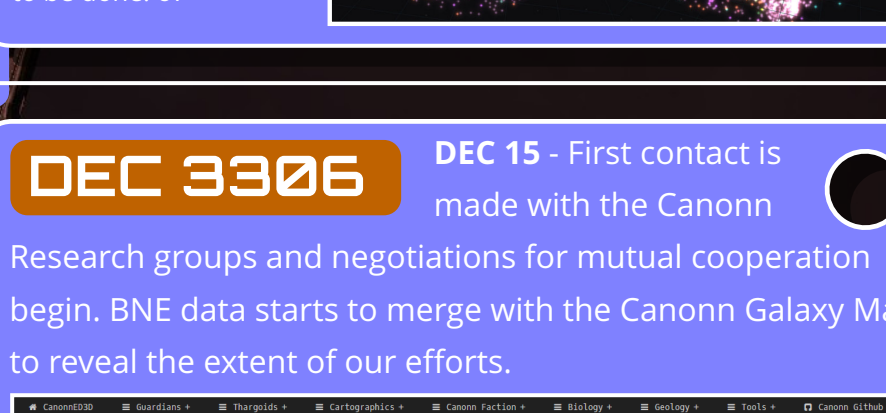

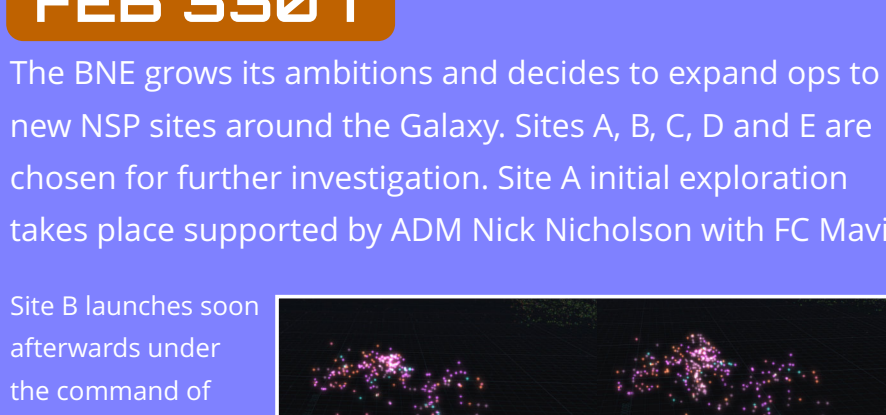

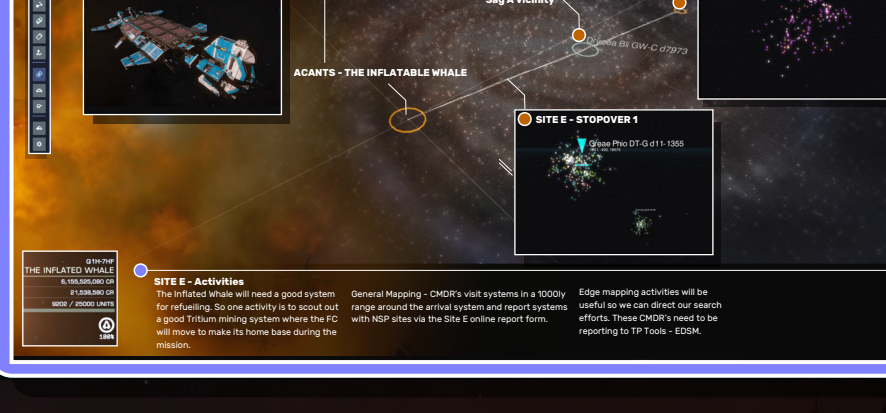

3) - Access our new website, now online at [banananebulaxpedition.com](http://banananebulaxpedition.com)

4) - Finally, before live events took place, ADM BatLeZone announced planning stages for the next Site F expedition.

The FC BatLeStar Banana will lead the new expedition, potentially with the support of FC Mavia. So watch these FC channels and the Site F channel on discord for details.

Live events also took place during the anniversary. See the screenshots and links to vids here:

### Welcome to...

The Missions section. Here you will find descriptions of each of the ongoing exploration missions and details about the current status of each one.

This covers 6 exploration missions, which are located across the galaxy and known as the BNE Site, Site A, Site B, Site C, Site D and Site E.  
Further sites will become active as player group membership grows...

## BNE SITE

QUICK NAV

[BNE SITE](#) [SITE A](#) [SITE B](#) [SITE C](#) [SITE D](#) [SITE E](#) [SITE F](#)

### STATUS AND STATISTICS

#### STATUS.

IDLE - FC - Raf Von Thorn - Emperors Grace on site. No coordinated mapping activities are underway though alone CMDR Sassynate is getting some work done. A new mission will be scheduled in the future.

#### STATS.

NSP mapping began in March 3306 and continuous activities paused in March 3307. Results of NSP mapping to date can be viewed in the excel google sheet. This can be summarized as follows:  
NEW Discoveries - 2 (Likely Game Bugs)  
Known Systems containing NSP sites - 3663  
Known NSP Sites - 6824  
Known Life - All crystal types. All langrange clouds except Storm types and all known Mineral Sphere types.

## SITE A

QUICK NAV

[BNE SITE](#) [SITE A](#) [SITE B](#) [SITE C](#) [SITE D](#) [SITE E](#) [SITE F](#)

### STATUS AND STATISTICS

#### STATUS.

ONGOING - FC - None BNE Affiliation. First visited in February 3306. No coordinated mapping activities are underway, but a known CMDR is mapping the area. The Site is to be revisited.

#### STATS.

Results of NSP mapping to date can be viewed in the excel google sheet. This can be summarized as follows:  
NEW Discoveries - 0  
Known Systems containing NSP sites - 218  
Known NSP Sites - 381  
Known Life - 1 pod type lifeform. All crystal types. No langrange clouds, sites are mainly in free space or in planet rings.

### SITE A SCANS

### CANONN DATA

## SITE B

QUICK NAV

[BNE SITE](#) [SITE A](#) [SITE B](#) [SITE C](#) [SITE D](#) [SITE E](#) [SITE F](#)

### STATUS AND STATISTICS

#### STATUS.

ON HOLD - FC - The BaTLStar Banana. First scouted in February 3307. Coordinated mapping activities have stopped for the BNE anniversary. A new expedition will be announced when we're ready.

#### STATS.

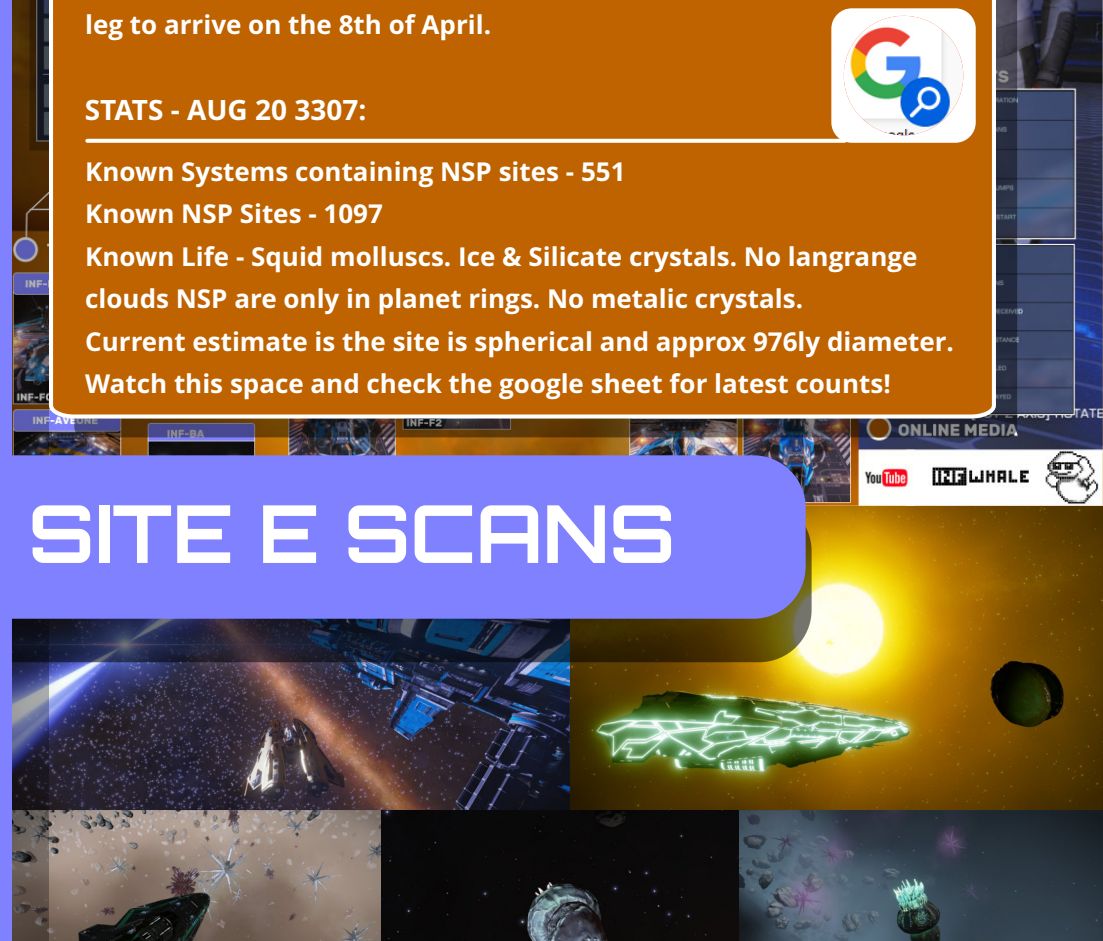

Results of NSP mapping to date can be viewed in the excel google sheet linked above. This can be summarized as follows:  
NEW Discoveries - 1 - Flavam Torus Molluscs  
Known Systems containing NSP sites - 82  
Known NSP Sites - 162  
Known Life - Torus dwarf systems and in planet rings. Calcite plates are also found in these NSP sites.

### SITE B SCANS

### CANONN DATA

## SITE C

QUICK NAV

[BNE SITE](#) [SITE A](#) [SITE B](#) [SITE C](#) [SITE D](#) [SITE E](#) [SITE F](#)

### STATUS AND STATISTICS

#### STATUS.

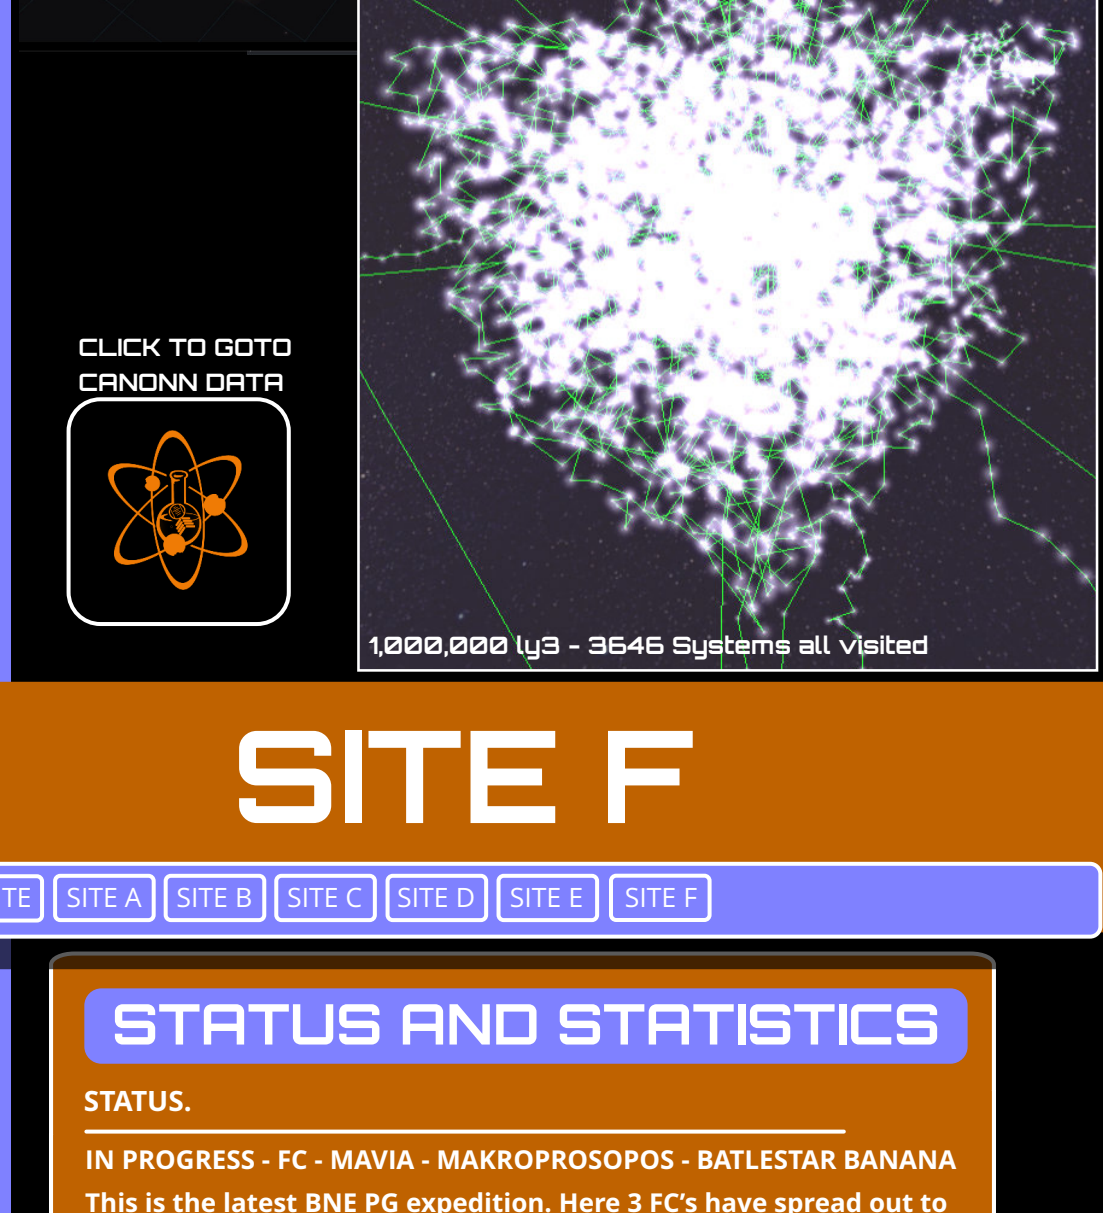

SCOUTING In progress - CMDR Scopelx  
Site scouting began in mid June 3307. An FC is in the area and some CMDR's from Site E may be dispatched to help.

#### STATS - JULY 8 3307:

Known Systems containing NSP sites - 8  
Known NSP Sites - 13  
Known Life - Albidum Chalice pods. Ice & Silicate crystals. Proto langrange clouds also identified. No estimate on the site volume at this time.  
Watch this space and check the google sheet!

### SITE C SCANS

## SITE D

QUICK NAV

[BNE SITE](#) [SITE A](#) [SITE B](#) [SITE C](#) [SITE D](#) [SITE E](#) [SITE F](#)

### STATUS AND STATISTICS

#### STATUS.

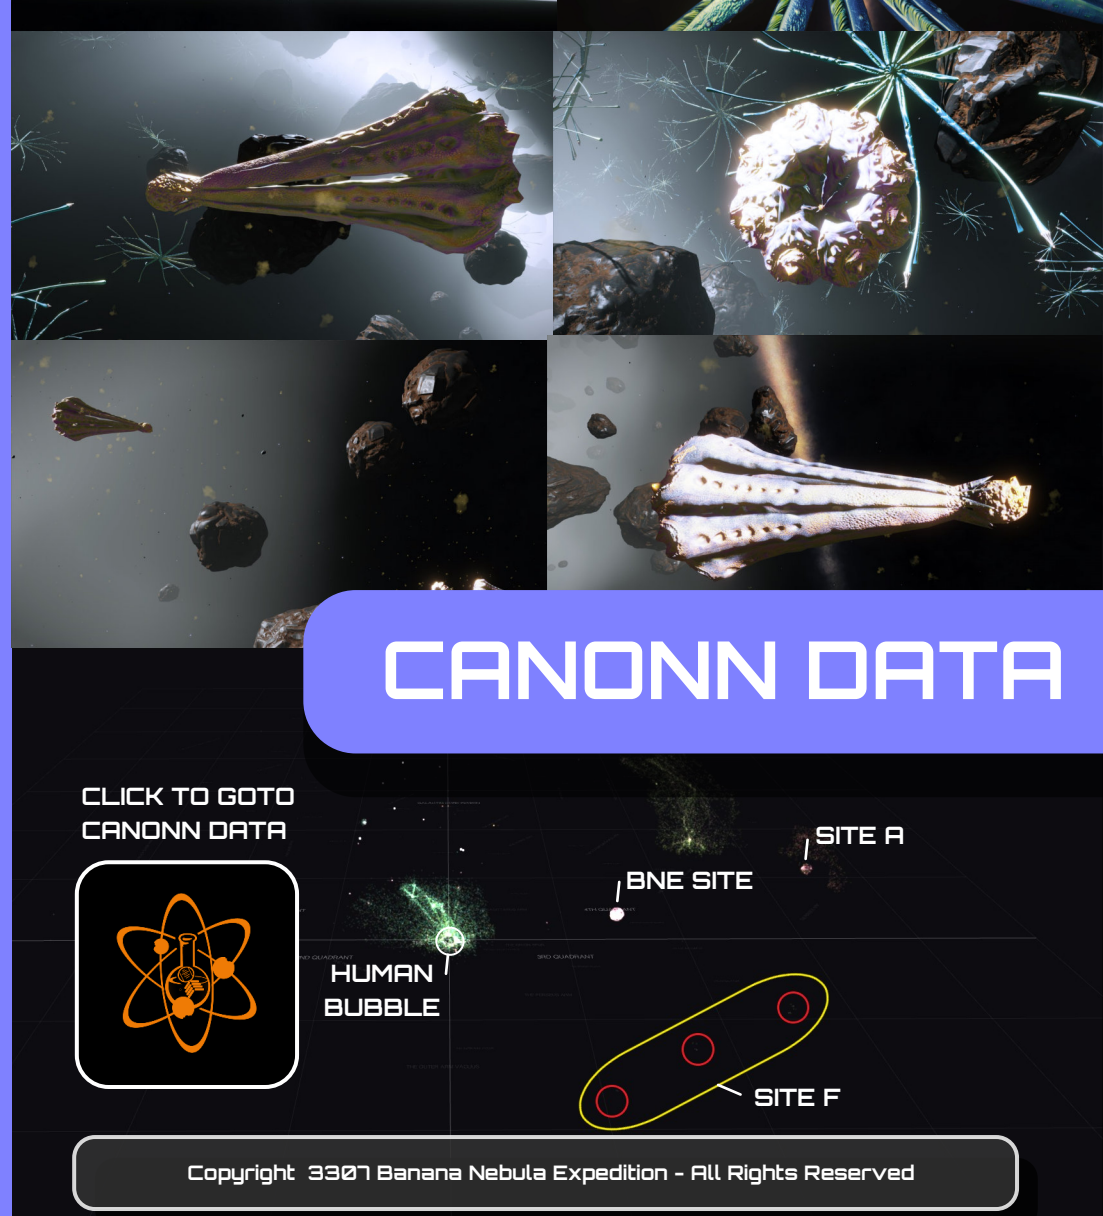

UNPLANNED - FC - None.  
An initial scouting mission has been performed. A full NSP mapping mission is expected to follow later in 3307.

#### STATS.

Results of the scouts NSP mapping to date can be viewed in the excel google sheet. Initial findings indicate Chalice Pods and Crystals. It is expected that the Site E mission will move to Site D at some point in time.

### SITE D SCANS

CLICK TO GOTO CANONN DATA

## SITE E

QUICK NAV

[BNE SITE](#) [SITE A](#) [SITE B](#) [SITE C](#) [SITE D](#) [SITE E](#) [SITE F](#)

### STATUS AND STATISTICS

#### STATUS.

IN PROGRESS - FC - The Inflated Whale  
Scouting began in March, by CMDR Darthwilhelm. The expedition journey to site began on the 2nd April 3307. After checking out a potential Site F, we stopped over near Sag A and then took the final leg to arrive on the 8th of April.

#### STATS - AUG 20 3307:

Known Systems containing NSP sites - 551  
Known NSP Sites - 1097  
Known Life - Squid molluscs. Ice & Silicate crystals. No langrange clouds NSP are only in planet rings. No metallic crystals. Current estimate is the site is spherical and approx 976ly diameter. Watch this space and check the google sheet for latest counts!

### SITE E SCANS

### CANONN DATA

## SITE F

QUICK NAV

[BNE SITE](#) [SITE A](#) [SITE B](#) [SITE C](#) [SITE D](#) [SITE E](#) [SITE F](#)

### STATUS AND STATISTICS

#### STATUS.

IN PROGRESS - FC - MAVIA - MAKROPROSOPOS - BATTLESTAR BANANA  
This is the latest BNE PG expedition. Here 3 FC's have spread out to map 3 separate locations in search of GYRE Tress and Pods out on the edge of the galaxy, 22000 ly from the human bubble.

#### STATS - AUG 20 3307:

Known Systems containing NSP sites - 6  
Known NSP Sites - 7  
Known Life - Gyre trees and Pods. Ice & Silicate crystals. Proto langrange clouds and NSP sites in planet rings. Approx 367ly diameter at this early stage.  
Watch this space and check the google sheet for latest counts!
