Welcome to...

The Seekers Rest. An E-magazine & website for the Banana Nebula Expedition player group & our own Nebula Discoveries LLC (NBLC) Faction & squadron.

Here you can find a NEWS ARCHIVE of our exploits, from birth to present day. A MISSIONS section, which describes our ongoing activities in the area of exploration. A NBLC FACTION section which attempts to explain who, what and why we love to snuggle. There is also an E-MAG ARCHIVE and a new CMDR ALBUMS section.

Feedback welcome via Discord DM to ADM Infwhale.

THE ARCHIVE...

Tag: Tutorial

The Tutorial series is programmed to help people up to speed with the game. Each episode covers a different aspect of the game, from the basics of flying and fighting to more complex topics such as the Galaxy Map and the Galactic Trade Network. Each episode is a self-contained lesson, so you can watch any episode you need to watch.

OCT 3301

Tag: Tutorial

Tag: Galaxy Map

Tag: Galactic Trade Network

Galactic Trade Network is a new feature in the Galaxy Map. It allows you to see the current prices of goods in the galaxy, and to find the best places to buy and sell goods.

Galactic Trading Mode is a new in-game mode that allows you to trade goods with other players. Galactic Trading Mode is a PvP mode, so you can be attacked by other players while you are trading. Your CMDR profile is also displayed in Galactic Trading Mode, so other players can see your ranks and your reputation with the various factions in the galaxy.

- MISSION PREP
- BNE SURVEY
- CANNONN
- SITE CRITERIA
- E-FIRE/RELIAS
- CYGNI PLANETS

Welcome to...

Hello Welcome Wanderer, I'm a guy, not that, descriptions do exist of the ongoing exploration missions and details about the cyg cyg cyg cyg cyg cyg.

Here is a place to record the progress, which is not to be taken as the official record, only the DHA data, this is DHA to DHA !!

Further sites will become active as ongoing groups become aware of the process.

BNE SURVEY

cyg cyg cyg cyg cyg cyg cyg cyg

STATUS AND STATISTICS

STATUS:

Cygnus X, Bat Nebs Phase: Cygnus's Gem or Cirrus, the constructed nebula is underway through where CNGR Sensators is getting some back data. A new mission objective has been added.

CRITS:

NOTP mapping begun in March 3306 and continuous activities proceed in March 3307. Results of NOTP mapping to date can be viewed in the Cygnus Gem or Cirrus Nebula, which can be found as follows:

NOTP Frameshift - 2.12ly Extra Range

Known Systems containing NOTP data: 3862

Known NOTP Sites: 1

Known USS: 48 crystal types. All Cargoscoop chunk except Storm type and all crystal and Spinel types.

STATUS AND STATISTICS

STATUS:

Ice Hydrocarbon - 47 - Hours - Ice Hydrocarbon Minerals

Scouting Mission Return, for CANNN Site Clarification. The expedition journey is one begun on the 2nd April 3307. After checking out a Hydrocarbon Ice Rich Emission off-axis, the scouts found a Metallic Rich Rg on the way to the Site of Figure.

CRITS: - 3317.12.3307

Known Systems containing NOTP data: 2

Known NOTP Sites: 1 - 1.12

Known USS: 48 - Spinel crystals, Ice & Silicate crystals, Pre hydrogen chloride, Carbon crystals, Metallic crystals, Carbon crystals

Current extension is the site is spherical and approx 5ly diameter.

STATUS AND STATISTICS

STATUS:

Ice Hydrocarbon - 47 - Hours - Ice Hydrocarbon Minerals - Ice Carbon Dioxide

This is the scouts NOTP mapping mission, which is now spread out to a 5ly diameter. Results of this mission are expected to be on the edge of the galaxy, 2200ly is from the human bubble.

CRITS: - 3317.12.3307 -

Known Systems containing NOTP data: 1 - 1.12

Known NOTP Sites: 1

Known USS: 48 - Spinel crystals, Ice & Silicate crystals, Pristine hydrogen chloride and NOTP Ice & Silicate crystals. Approx 40ly diameter at this early stage.
